

1/2 Dome- Cleaning capsule of the future

The dome is a portable clothes cleaning capsule.

Solution

-When I asked myself 'if I do like something about the whole laundry process what is that?' my response was: 'The only thing I like about laundry is when somebody else does it for me' Huge amounts of resources are wasted inefficiently to wash our clothes. The community wastes resources and the individual as well. Besides that, doing the laundry cannot be fun. What is fun, healthy or efficient can be a part of laundry with "the dome". The dome is a product that wants to replace the current model of cleaning done worldwide. From private cleaning the whole urban system evolves public washing. More details and updates to come. Thank you
