

1/2 **BoxFresh**

Fresh up your clothes in the end of the day to extend time between washes

**Solution**

Often are most the clothes in your pile of laundry not stained and not dirty, they just feel worn and smelly and has not the fresh feel of the clean clothes hanging in your wardrobe. With BoxFresh that's not a problem anymore, just fresh up your clothes in the end of the day and they will last much longer between washes and as a consequence they last longer also in terms of wear and tear. BoxFresh uses only the air in the room and the regular power outlet to circulate air with the scent of your choice to make your clothes feel fresh again. The cartridge can also be used for your own scent recipe that you can share online on the BoxFresh community. BoxFresh is good for the environment and for your clothes and you don't have to manage the laundry as often as you used to.
