

1/2 **i love green energy**

Solution

I Love Green Energy ...

that is the message to say yes, i'm ready for a healthy environment and i think about what can happen in the future...simple message to create a big deal, because people love shirts with i love blablabla...i think its good to promote merchandise and other stuff to popularize the message for greenpeace

special here is the heart. i configure half into a power outlet...
