Wireless Transmission of Electrical Energy

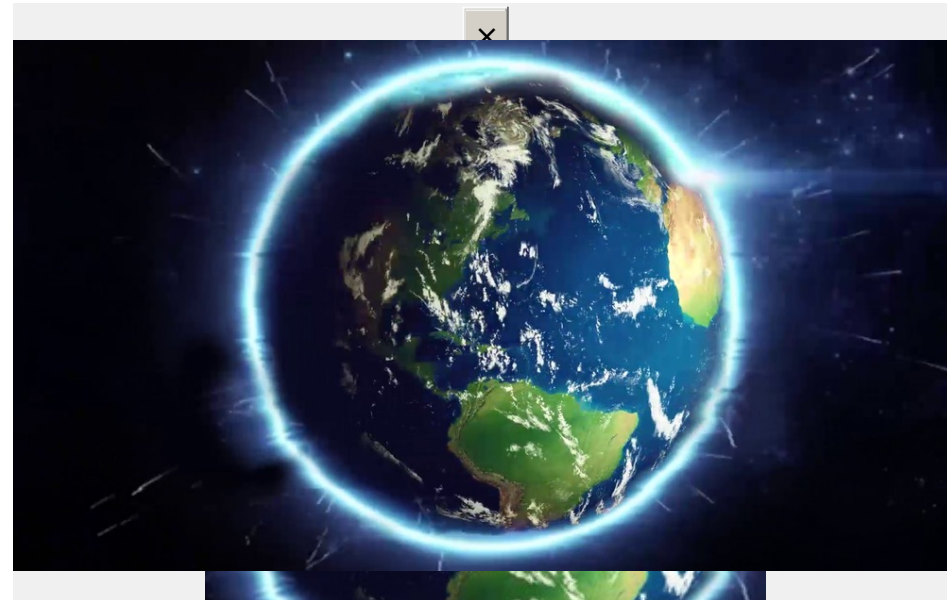

Wireless Transmission of Electrical Energy by NIKOLA TESLA

Observation

More than 100 years ago there was a genius who wanted to gift humanity FREE wireless energy. Sadly, IOT was not invented back then, some big corporations and wealthy individuals were not pleased by Tesla's idea for FREE world wireless energy.

Conclusion

We have to learn a lesson from our previous mistakes as a species and make Tesla's idea a reality! Even if not completely free as Tesla once imagined, this could still prove very beneficial to humanity all over the world - to have a wireless access to electricity practically everywhere!

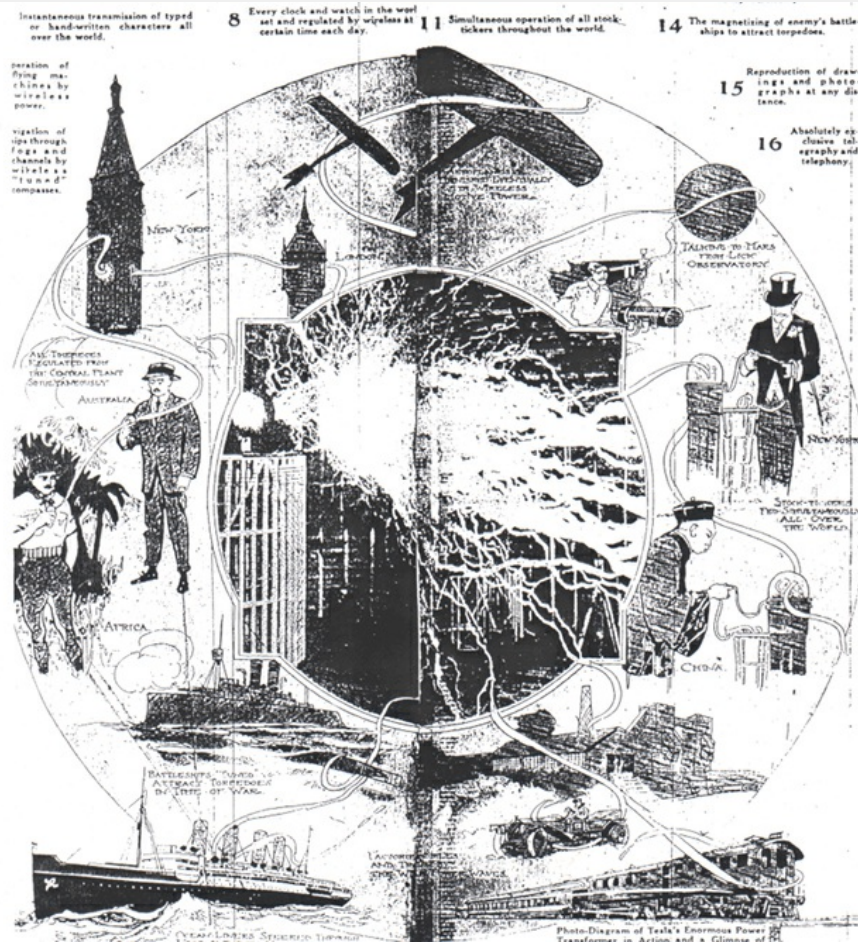

Solution

Tesla's Wireless Energy "World System" is to turn Earth into one gigantic dynamo. His inspiring technology is a proven scientific fact, relying on some unexplored features of our planet and its atmosphere. It was tested, demonstrated and used in practice. Sadly, the technology wasn't implemented and humanity failed to gain a huge advantage... but that's where we, the people of 21st century, step in!

What makes your solution unique?

Tesla's lifetime work was to benefit humanity in all aspects of life. He was an inventor, scientist, dreamer, but most importantly, he was a human being in his heart. Rather than thinking of huge profits and interests, Tesla thought how to improve what we have. His biggest passion was electricity!

How it works: Step 1

All possible sources of pure energy could potentially assist Tesla's World Wireless Transmission of Electrical Energy. Sustainable and long term options, such as nuclear power and solar rays, geothermal energy and wind force, other future energy sources could work in conjunction to the technology.

How it works: Step 2

Nikola Tesla discovered means to draw on the Earth's ionosphere for a wireless broadcast of electric power around the world. With the exception of the construction cost of the network of broadcast towers themselves, Tesla's "World Wireless" system would have provided free energy for all mankind.

How it works: Step 3

We can't even imagine the benefits of Tesla's technology if it's available today! The world as we know it would've been so much better! All electrical devices and means of transportation would've been ecological and constantly powered all over the planet. Free electricity for everyone, everywhere!

Describe how your solution works step by step:

For everyone who is interested in physics and science behind Tesla's lifetime work, as well as Tesla's motivation and way of thinking, I would suggest reading his autobiography, as well as watching documental videos about his inventions, such as: 1/ <https://www.youtube.com/watch?v=NFcj5Op2cC0> 2/ <https://www.youtube.com/watch?v=Chg47fER5Nw> 3/ <https://www.youtube.com/watch?v=IMJr-oUYYDA> and many more... check the internet and you will be amazed what undermined genius in Nikola Tesla we had living on our planet Earth. Forever respect for him!
