

## 1/2 Nopales, Tunas y Pitahayas

National excellence

### Solution

Hello! My name is Elizabeth Izquierdo. I live in México, and my inspiration was the fruits of the Mexican countryside. The nopales, the tunas and the pitahayas are fruits derived from cactaceous plants. I wanted to represent them in a simple way, respecting their colors and shapes. In my country these foods are very consumed, being the nopal part of the national shield of our flag.
