

1/3

Recovery Buzz Track

Solution providing maximum traction in sand, mud, snow and ice terrain

Target group

1: Families with kids and 2: Young people driven by design & innovation

Observation

Adventurous travellers and families who like to be prepared for challenging situations during travelling and discovering off-road countryside, beaches and any difficult and rough terrain.

Conclusion

People need a simple, portable and compact recovery solution for extreme situations in off-road trips with grip optimized for any weather condition. An effective and easy to use accessory.

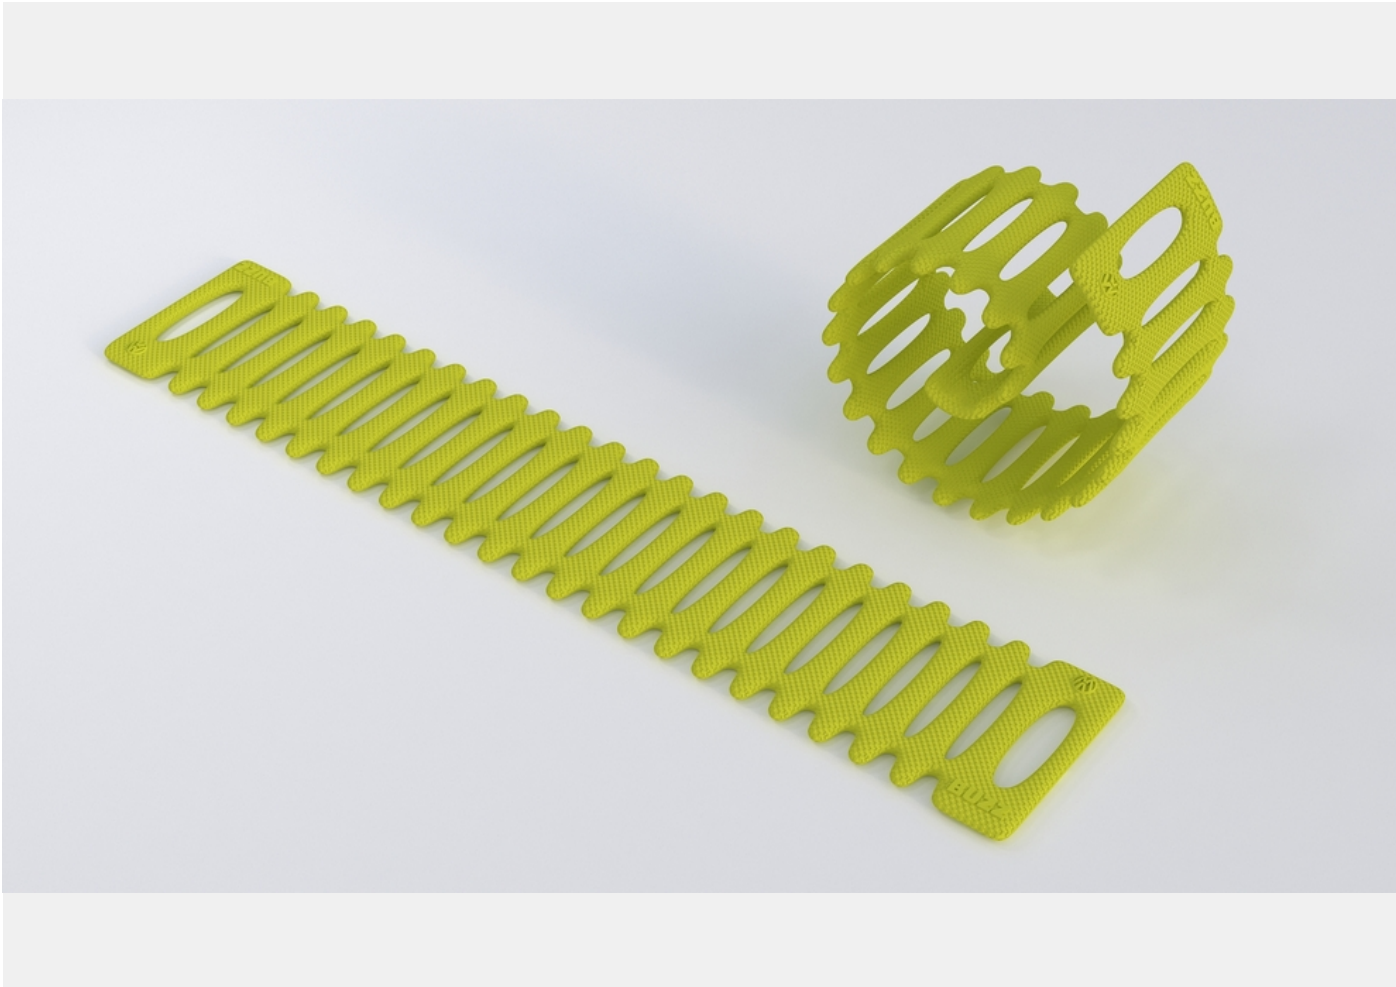

Solution

This recovery track can be printed in any chosen colour and length. There is also a possibility to customize the track with a name or any word chosen by the client. It can be printed from TPR or PVC. It is easy to use and effective in many rough terrains. Flexible design rolls up for compact storage in vehicle trunk or rear seat floor.
