

## 1/2 Duuude hunting waves

Showcasing the sport of surfing.

### Solution

Hi, my name is Iván. I live in Venezuela, Mérida and I've been working as a designer for 15 years. I created this design for Victorinox because I found that elements related to the surfing -like waves and dynamic postures- can be treated to create interesting compositions along with the beach landscape. On the other hand, this sport is currently practiced all over the world to the point of having professional players and world championships.
