

## 1/2 Basketball

When a player is left one-on-one with the basket

### Solution

Hi, I'm Mariam, 21 from Georgia. Basketball is the first major sport that I was introduced to by my brother, so it has a sentimental value for me aside from other feelings. In this design, I tried to show the other side of a player's life, not the glorious game itself, but when the led lights are off and he/she is left alone in the empty court with a ball, isolated to get really connected with the sports.
