Electronic learning

Using Technology and devices to improve your skills such as computers, disc, TV and phones

Target group

Management/Project Lead, White Collar, Blue Collar, Trainees, All, and Custom (Male and female within 5-40)

Observation

Most people at this age range wants more from learning, because they don't get enough from their teachers in school and they want to explore more so they can be skilled to enable them deliver effectively in their schools and workplace.

Conclusion

This has made most people to be shy, low self esteemed , and not been able to express themselves or work creditably when called upon.

Solution

There should be a method where all learning/tutorials will be provided in disc, computers, TVs, phones Etc. This exclude going to school. This will enable us learn more skills and gain more knowledge from topics and contents in this devices. Lastly, learning should be made compulsory in a way that one won't have choice but to learn and this can be achieved through putting contents and topics on this devices that enable one select a content to learn from before any other page can open.
