

1/2 **The Cocoon**

Backpack made of a light fiber shell with a blue LED light build in. Silicone exoskeleton.

Solution

Backpack made of a light fiber shell to minimum the weight of the bag and make it breathable.

The back towards the spine is made of soft foam that follows the body atonomy.

Blue LED light under/in the fiber shell. Silicone exoskeleton.

Inside the bag I had in mind a removable shelf/lamellae system to organize the content. Organize the school books after subjects. Put the Mp3 player in the pocket designed for this. On the left side of the bag: Earphone cable exit.

Status: 18.06.2018

Bag it!

2/2

The Cocoon

Backpack made of a light fiber shell with a blue LED light build in. Silicone exoskeleton.
